August sales fell EGP 14,436

Commerce performance brief · 1 January–27 September 2026

Sales (EGP)	Product profit (EGP)	Product margin	Average order (EGP)
551,169	**144,784**	**26.27%**	**525.42**

What changed in August

Sales fell **19.6%**, from EGP 73,807 in July to EGP 59,371 in August. Financially eligible orders fell from **131 to 122**, and average order value fell from **EGP 563 to EGP 487**. Drinkware contributed **EGP 6,563** of the decline, about **45%** of the net change. This identifies where to investigate.

Two reviews to start

01 · Merchandising — investigate Drinkware

Drinkware had the largest negative contribution. Together with Kitchenware it accounted for 47.5% of period sales. Compare July and August availability, prices and promotions by SKU. Bring back the largest changes in units and sales, and track product profit when testing a response.

02 · Operations — review Social Commerce outcomes

Social Commerce had **34 of 194 orders cancelled or returned (17.5%)**, versus **37 of 357 (10.4%)** for Mobile App. Separate cancellations from returns, check the recorded reasons and compare similar products and payment methods. Report each rate with its order count.

Decision requested: Assign one owner per review and agree on a date to decide what to test.

Scope. Financial metrics cover 1,049 of 1,059 delivered orders with complete financial data. Product profit is merchandise sales less product cost, before shipping, refunds, marketing and overhead. Channel outcome rates include all recorded statuses. September ends on the 27th and is excluded from the July–August comparison.
